

Do your part to help protect the environment and it's resources by utilizing cartridge recycling in your managed print services.

We've developed this sustainability program to help you in your commitment to protect the environment. By giving you the option of returning your used cartridges instead of adding to the world's ever growing landfills we applaud your efforts and encourage you to continue your "green" initiatives.

- **What is included in each recycling kit?**
 - Each kit includes 3 unassembled laser cartridge collection boxes capable of holding 6-12 used laser cartridges. All 3 laser collection boxes are labeled with a pre-paid ARS tag to go back to the Cartridge Recycling Center facility.
- **Can other items be recycled other than laser cartridges?**
 - While the primary purpose is the recycling of laser cartridges, other items acceptable in this program are fuser cores and inkjet cartridges. All cartridges and cores can be included in the same recycle box.
- **How should I package the items being returned?**
 - Once the collection box is assembled it can hold a number of cartridges. The original packaging is always the best way. If the original boxes are not available, bubble-wrap, newspaper, or other suitable packaging material is the next best method.
