Re: Scheduling & Programming Services.

Dear Sir/Madam,

John Sisk & Son Ltd. have used the services of PMPS Ltd. to supplement our in-house scheduling resources, especially on projects and tender submissions where Primavera Programming Software is used. They have worked closely with our Management Teams on a number of projects and the feedback we have received from the teams has been very positive.

We have found PMPS Ltd. to be very cooperative and responsive to our requirements. Their execution of works and the documentation submitted has been extremely professional and reliable.

We would have no hesitation in recommending PMPS Ltd. as a scheduling service provider and we are very pleased with the service we have received.

Yours faithfully,
For and on behalf of SISK,

TOM WALL
