

WHY EMPLOY US @ AESTHETIC LANDSCAPES?

www.aestheticlandscapes.co.nz

Angelique Lambermon, Landscape Architect Ph: 09 524 7108 Mob: 027 519 7108

Residential areas, Parks, Playgrounds, Colleges, Shopping centers, Golf courses, Industrial parks, - What do these places have in common? They all look better with great landscaping! And to obtain great landscaping you need to plan well and plan with a great design. @ Aesthetic Landscapes.co.nz we have proven experience with over 9 awards in the last 6 years, making this company one of high acclaim.

Angelique and her Team can help you design your garden from small vege patches to large urban commercial sites. No garden is too small or too large.

[Angelique](#) and her Team design outdoor areas that are useful, beautiful, ecologically enhanced and fit for a purpose, as well as represent a clear expression of the requirements of the brief. They work with architects, surveyors, and engineers, to find the best place to put roads and buildings and she works with environmental scientists to find the best way to conserve or restore natural resources.

As landscape architects we must first consider the purpose of a project, and then analyze the natural elements of the site which may include the climate, soil, slope of the land, drainage, and vegetation. We observe where sunlight falls at different times and also look at existing buildings, roads, walkways, and utilities. Landscape Architects tend to look into much more depth than a general garden designer where they have not been trained in the wider context.

After an onsite [consultation](#), we will prepare a [draft design](#). We must comply with any local, or Government regulations and Computer-aided design ([CAD](#)) is an essential tool for most of us and @ Aesthetic Landscapes.co.nz we are well conversed with CAD software and geographic information systems ([GIS](#)) technology. We can also use video simulations especially in large scale and/or environmentally sensitive areas to help clients understand the plans.

We can on request produce written reports, sketches, models, photographs, land-use studies, and cost estimates. When the plans are approved, we prepare working drawings. The general contractor or a landscape contractor usually directs the actual construction, but @ Aesthetic Landscapes.co.nz we can be involved throughout the process.

What about the future?

A growing population means there will be more construction in smaller spaces. As landscape architects we will need to plan well for these projects ensuring we design ecologically & sustainably. Land costs are also rising and the public is demanding more beautiful spaces, so we must design with the future in mind. @ Aesthetic Landscapes that is what is on the forefront of our mind. Our Motto [***“Designing today’s Landscapes for Tomorrows World”***](#). That’s why you should choose us, because we will be there for you in the future too!
