

Model 832 Independent Public Address System

Contact us for information about other combinations

Standard Activation Methods

1. Using a push button box with 3 activation buttons, including indications on system run. Predefined signals or audio will sound over the speakers.
2. Via a handheld radio with keypad: programmed signals on the siren cabinet can be controlled, as well as live public address.
3. Activation using a microphone at the base station control. Programmed signals on the siren cabinet can be controlled, as well as live public address.
4. Activation via dial-in: 4 of the programmed tones or music can sound.
5. Activation from the local siren cabinet: all programmed siren tones can sound as well as public address using the siren microphone.
6. Scheduled tones and music: sounded using the event scheduler of the CAP Controller (CapCon 4102).
7. Music, voice or bugle tones can be recorded by the user (Windows Media into the micro PC).
