SYSTEMS INTEGRATION

Our commercial property solutions include individual services or completely integrated systems for burglar alarm installation and monitoring, video surveillance and digital recording systems, access control solutions, traditional and electronic locksmith applications for businesses and properties of all types.

SECURITY SYSTEMS

Complete alarm system installation, monitoring and service & maintenance plans are available for business owners and commercial builders. Web-based reporting and management of single or multiple locations, devices and users via sophisticated Internet platform.

VIDEO SURVEILLANCE

Security camera installations with digital recording services are a specialty of ABV. Camera systems can be monitored and controlled via user friendly web interface as well as hand held devices (palm, windows mobile, smart phone, etc.).

ACCESS CONTROL

Numerous industry leading access control solutions for facilities protection and risk management. Single or multiple facility solutions are available.

LOCKSMITH

Traditional and electronic locksmith services for a variety of commercial needs.
