

**Towable - Extendable - Mobile High-Power Public Address Siren**

ASI's towable, extendable high-power public address siren is a portable field notification unit for:

- Temporary public gathering area
- Emergency mobile housing areas for disaster driven relocated residents
- Fast replacement for a disabled fixed siren
- Tactical operation, forward unit deployments
- Immediate response to disaster area with full self sufficient means

The mobile speaker tower can operate as stand-alone alerting system and autonomously controlled (local key-able microphone) or be integrated with ASI Next Generation CAP Alert (other integrations can be ordered or added by the customer).

The mobile system requires minimal operator set-up and can be rapidly deployed before, during and after a disaster.

The portable unit can be moved with any vehicle and airlifted. Storage and shipping is extremely easy.

Broadcasts live and recorded voice messages, bugle tones or siren signals.

Standard sound pattern is Omni-directional, other patterns can be ordered.

**Deployed by a single person in 5 minutes! Pull outriggers and push a single button, and the siren is up and running! Easy to tow and locate at the exact available corner. Easy shop store and with amazingly small storage area!**

**Features**

- Easy to tow and deploy—one person operation!
- Safe operation, height according the FEMA guidance
- One year free wireless control with the CAP controller option
- Tone and voice
- Local and remote activation
- Extremely easy storage
- Networked to the Mass Notification System via:
  - CAP — IP radio modem
  - UHF or VHF radio

The packed siren is short enough to fit in a standard container or in a cargo airplane.

- Trunking radio
- Wired (POTS) interface
- Independent power:
  - High Efficiency Solar Panels
  - Batteries
  - AC (simple wall outlet) for long deployment.
- Many siren brands available to match your existing system for easy integration.
- Special solar panels angles and height allows deployment almost regardless of the deployment azimuth, allows the operator to select the safest placement. Until power can be hooked-up.

**Special offer for 2010!**

One year free remote control with secure browser access when purchasing the cell modem controller in the USA. Activate the siren from the convenience of your PC and delegate partial temporary activation rights anytime for events. Later years subscription at amazingly low costs!
