a Compact Porcelain Furnace

The **Focus 2010** compact porcelain furnace features a new concept muffle designed to shorten firing time by allowing the use of higher heat rates with no-overshoot temperature control. The unit's advanced temperature control system provides precise temperatures at low-, middle-, and high-level temperature settings. A one-key-press calibration adjustment feature allows quick adaptation of firing cycles to different ceramics. The furnace is available in standard and high-heat versions, both with a 30-month all-inclusive warranty.

c Implant Planning Portal

The **iConfiDent** Web-based implant management system allows dentists, specialists, and technicians to share access to case information in a central, secure location online. The system is designed to enhance communication and coordination of case details, x-rays, images, and notes; to facilitate treatment planning; and to simplify material selection and ordering. It features an industry-standard, HIPAA-compliant security and data encryption, automatic online product upgrades, and a Wizard function to assist with proper part selection from multiple suppliers. Monthly and yearly subscriptions as well as a free 30-day trial evaluation are available.
