## TextQ-DriveSafe is a FREE APP to assist in keeping you: driving legal, safer and in touch

**The horrible reality:** Every day, on average, 16 people die, 11 of them teenagers, because of distracted driving. In addition, over 1,300 people are injured each day because of distracted drivers.

**No More Excuses** – TextQ-DriveSafe Phone Application is FREE, blocking phone use when over 4mph, sends your choice of automatic responses, One Click Panic Button with location message and with optional TextQ-Web keeps track of where you are, and is manages the Phones using TextQ-DriveSafe Remotely.

The optional textQ-Web features are only \$40 a year to manage and update 5 phones per account remotely either from This site or from the Parent or Admin Phone.

**The Law:** It is illegal in more than 36 states to text while driving. Distracted drivers are a danger to all of us everywhere on the road. Many States are seeking to restrict phone use for Truck drivers and for bicyclists.

- TextQ's goal is to increase safety of our roadways for everyone and provide a simple way for those responsible to monitor individuals on their account You focus on driving
- You keep your eyes on the road, hands on the wheel, and your phone on DRIVE SAFE mode,
- Your phone automatically replies when you get a text or call,
- You avoid looking at your phone while driving, and instantly let others know you will respond later.

**"EveryOneTexts worked with law enforcement, parents, technicians and many other stake holders to deliver a safe texting solution that will address current laws, phone user safety and tracking concerns. Officers from the Buffalo Grove (IL) Police Department used their expertise and knowledge in the area of traffic safety to specifically address the teen aspects of this application", said Steve Meister, Founder of Everyone Texts.**

## **TextQ-DriveSafe is a FREE APP to assist in keeping you: driving legal, safer and in touch**

### **FEATURES**

#### **Parental/Administrator Mode:**

- TextQ puts a block screen on your phone while disabling phone use.
- TextQ will auto-reply to incoming texts and calls when you set it up to do so.
- One-click Emergency Panic Button notifies designated people while providing them your current location.
- Simple one-click Emergency Override Button enables phone use for two minutes, automatically notifying the parent or employer of the emergency use.
- Built-in scheduler turns on and off safety features.
- Sends a message that you do not accept texts from those not in your phonebook.
- Auto-Reply Mode: standard or custom auto-reply to texts or calls while you are driving, in meetings, in class, eating, sleeping or when you just can't answer at the moment.
- Parents/employers are automatically notified when GPS is turned off or product is uninstalled.
- TextQ offers a One-Click Panic Button to notify parents or employers of an emergency along with the most current location.
- Trace and monitor routes traveled - while also storing the speeds driven. This feature optional.
- Graduated Driver's License laws (Illinois) and others recognized for under age 19.

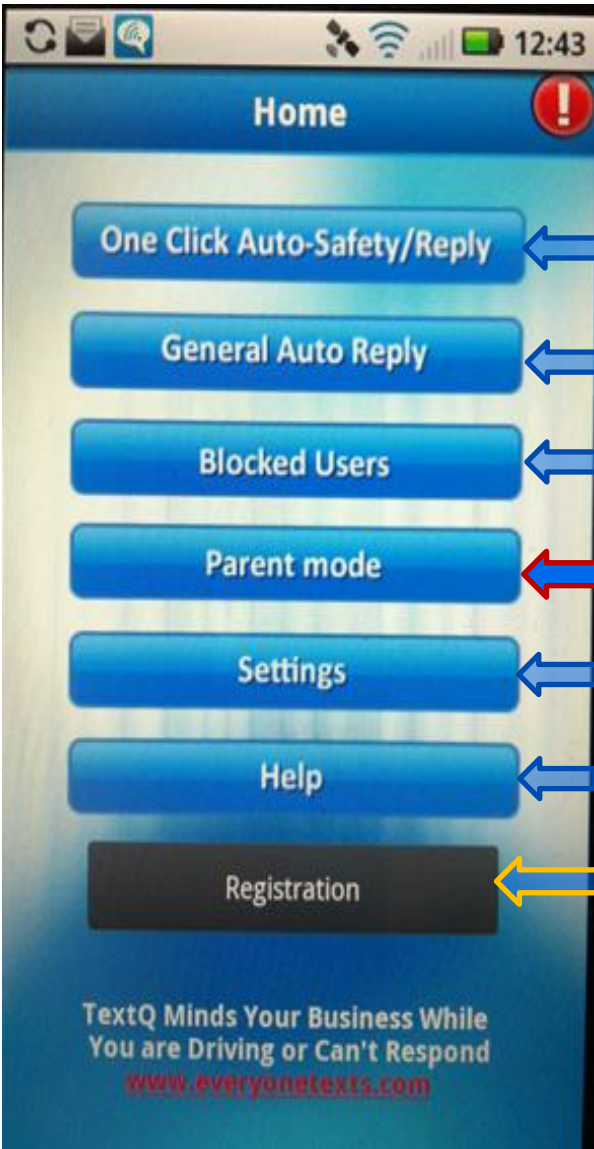

#### **About EveryoneTexts Inc.**

**E1T is a company specializing in Smart Phone Applications Development. E1T anticipates the development of many more applications for the safety and convenience of Smart Phone users. We are currently developing a Social Media and Dating application, applications to track and monitor special needs children and the elderly. With the power and speed of modern communications capabilities, and lower cost bandwidth and storage space, we are able to deliver more affordable solutions to those who need it the most.**

Parent Mode Indicator Information Only. Turns on when Parent Mode is turned on in "Parent Mode" from Home Screen

When Activate is Selected and Phone calls go to Voice Mail or in some cases unanswered:  
The active Auto Reply Message will be sent to the Caller

**E1T's Parent Mode**

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

Activate or Disable all the Parental Safety Features and Functions.

Phone Numbers to be text when "PANIC" Button is hit or any violations of the product are detected

Phone Number to be Contacted when driving and texting occurs

Schedule Phone Monitoring and Feature Activation and Disabling

Set the Maximum distance the Child should be driving and notify Parent if exceeded. Track and Store the Current Latitude and Longitude of the Childs Phone and allow one touch Mapping and addressing of the Childs Location.

You must have registered this phone and use Your created User Name and Password established at time of registration

**E1T's Parent Mode General Settings**

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

← Activate or Disable all the Parental Safety Features and Functions.

← Parent Phone Number to be Text Notified

← When Vehicle is moving at greater than 4MPH Activate Safety Features and Text Violation Notifications

← Schedule Phone Monitoring and Feature Activation and Disabling

← If Activated Parent will be notified that the Child turned off the GPS on the Phone. This would cause the phones safety features to not function and not protect.

← Click here to Activate the Auto Reply Mode Features

← Activate the Proximity Mode to know when child exceeded expected destiny and also see where the Child is at any time

← Activate the Phone Block Screen when vehicle exceeds 4 MPH.

**E1T's Parent Mode Emergency Call Numbers**

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

← Home

← Activate or Disable all Activate Emergency Only Use to Block Phone when driving over 4 MPH

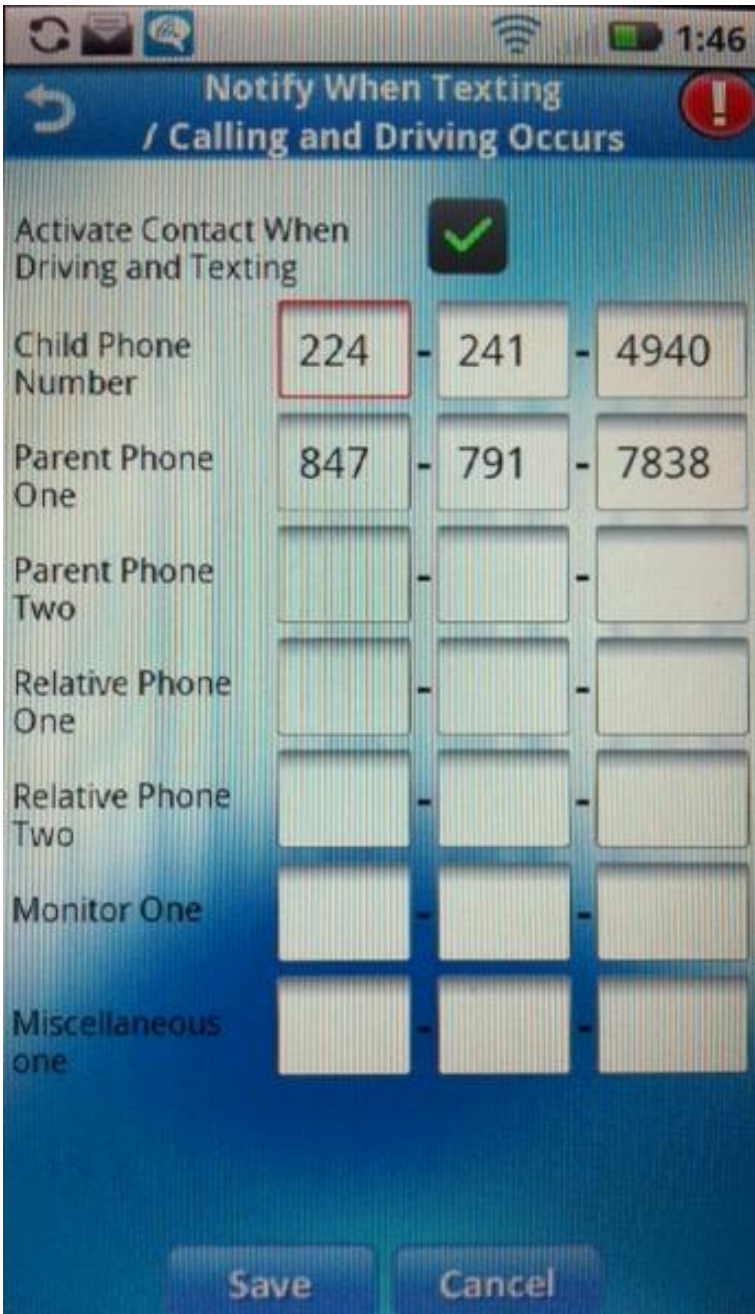

← Child Phone Number being Monitored

← Enter a Phone Number in each category to have that phone receive a text when the Child overrides the Block Screen to make an emergency call.

← This allows the Parent to know the Child may be in trouble or just unlocked the phone to make an unauthorized text or phone call.

**E1T's Parent Mode Notify Call Numbers**

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

Activate or Disable Driving and Texting Notification. If the child Texts while driving the Parent will be notified.

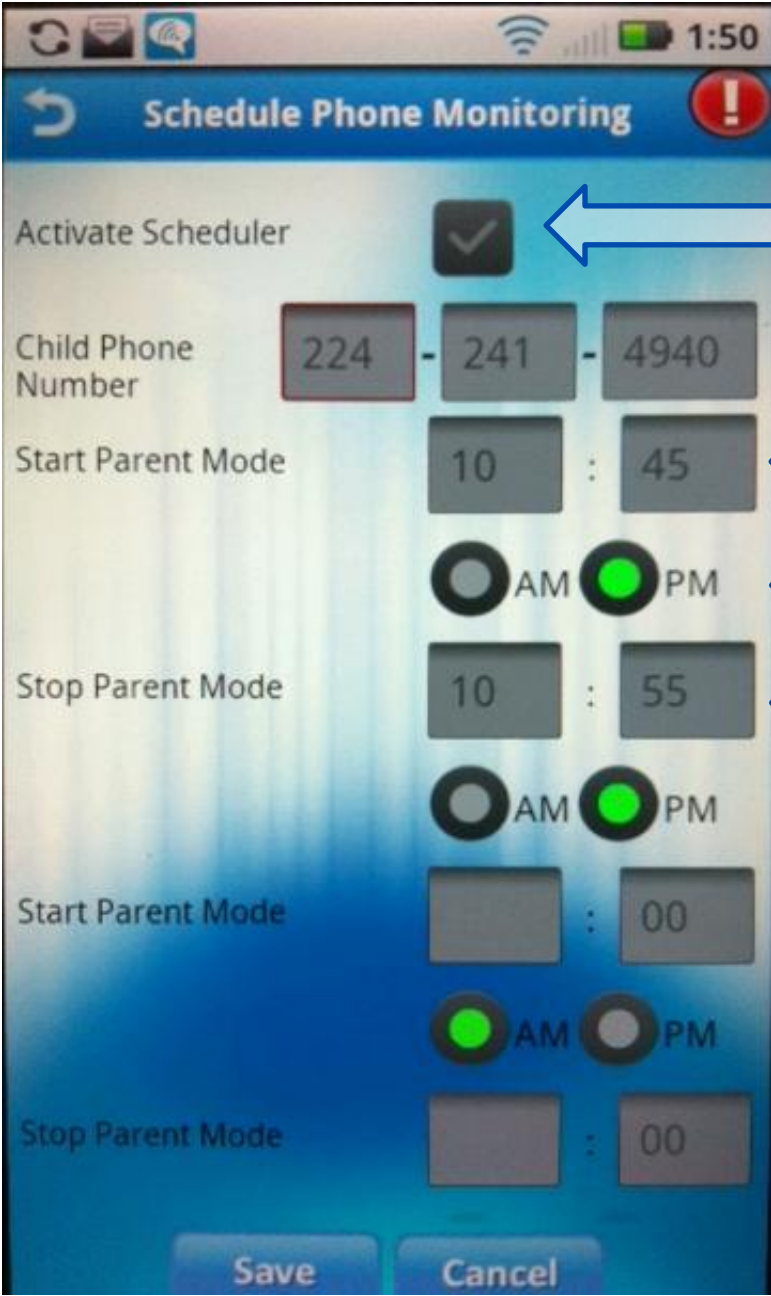

Child Phone Number being Monitored

Enter a Phone Number in each category to have that phone receive a text when the Child texts while driving over 4 MPH

This allows the Parent to know the Child has text while the were driving and should be paying attention to driving safe.

**E1T's Parent Mode Feature Scheduling**

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

Activate or Disable the Scheduler. You can preset 3 start and stop times for the Parent Mode to be automatically activated and then disabled

Child Phone Number being Monitored

Set the Hour and Minute to Start the first scheduled Parent Mode Activation

Set the AM or PM for first scheduled Parent Mode Activation

Set the Hour and Minute to End the first scheduled Parent Mode Activation

Follow the above steps for scheduling of the second and third scheduling options

**E1T's Set Proximity Radius Screen (1 of 3)**

Parent Mode Proximity screens control the home base address to determine the distance or radius warnings when one exceeds them, the viewing of the phones current location and the settings for the TextQ-Tracking features.

**Home** ←

← Activate or Disable the Proximity Checker. This Tracks How far a child drives and allows Parents to see the current Address or area the Childs phone is in at any time

← Child Phone Number being Monitored

← Parent Phone Number

← Set the Home address to use to detect the distance Child Drive

← Set an alternate address to calculate distance Child drive

← Set the address for the Home Address and or Parent Phone above. This is the starting point to calculate the distance the Child drive

← Notify the Parent when the Child drive in excess of this distance

## E1T's Set Proximity Radius Screen (2 of 3)

Parent Mode Proximity screens control the home base address to determine the distance or radius warnings when one exceeds them, the viewing of the phones current location and the settings for the TextQ-Tracking features.

← The Latitude where the Childs phone is at that moment

← The Longitude where the Childs phone is at that moment

← Check to notify the Parent that the child has exceeded the expected Distance of drive

← Check to notify the Child that they have exceeded the expected Distance of drive

**E1T's Set Proximity Radius Screen (3 of 3)**

Set proximity Radius – TextQ-GDL and TextQ-Track

TextQ-GDL (graduated drivers license) sends a notice to the block screen as well as disabling the bluetooth capability.

TextQ-Track allows the tracking of the phone with a start time, duration to store tracking data of the phone and the interval or how often these records will be written to the TextQ Server.

Activate the GDL feature for those under 19 several States

Activate the Safety Tracker

Enter the Name for this Tracking

Enter the start date for this tracking

Set the Start Time for this Tracking "Time is Eastern Time Zone"

Enter the Time Interval – How often to write out Tracking Data

Enter the Duration the Tracking Records should be written (this is in minutes) so each hour would be 60 minutes.

Parent Mode Controls all the safety feature such as: Blocking the screen from use when vehicle is greater than 4 mph, Allowing the Parent to Locate You in an emergency (or when Your being bad), notification if the application is deleted or bypassed and input the phone numbers to be notified to all of the above.

- General Settings
- Notification No.
- Proximity Radius**
- Monitoring
- Emergency Setting

## Set Proximity Radius

You can now change setting.

*\*Indicate mandatory fields*

\*Child Phone Number:  (xxx-xxx-xxxx) ← Child Phone Number being Monitored

Distance From:  Home Address  Parent Phone ← Set the Home or Alternate address used as home base distance allowed

Parent Phone One:  (xxx-xxx-xxxx) ← Parent Phone Number

\*Home Base Address:  ← The Home Address and or Parent Phone address used as the starting point to calculate distance Child traveled

Distance from Home Allowed Start Parent Mode:  (in Miles) ← Notify the Parent when the Child drives in excess of this distance

GPS Geo Code:  [View Map](#) ← The Latitude / Longitude where the Childs phone is at that moment and View Map with their current location

Notify Parent:  Enable  Disable ← Check to notify the Parent and or Child that the child has exceeded the expected Distance of drive

Notify Child:  Enable  Disable

Proximity Checker:  Activate  Deactivate ← Activate or Disable the Proximity Checker.

TextQ-GDL:  Activate  Deactivate ← Graduated Driver's License Safety

Track Title:   Enable ← Trace and monitor route – Name the Track

Select Start Date:  ← Start Date of Route Tracking

Select Start Time: Hour:  Minute:  ← Start Time of Route Tracking

1-9999 Minutes ← Duration of Route Tracking

Time Duration:

← Download the stored records for the Track title above to assist in knowing where and when the phone was at any locations of interest. This feature may assist in locating missing people, as well as knowing those You care about are endangering themselves

Every Two minutes TextQ will store a record with the Location, speed and time of the person or vehicle,. This data will be stored in an encrypted database on the TextQ server for retrieval.

## E1T's Communication Methods

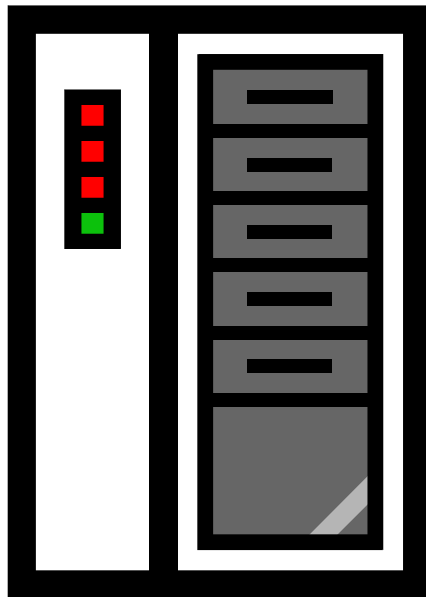

Home  
Parents Phone

You may Manage a Phone with TextQ from Your phone via the TextQ-Web, the TextQ-Web or the Childs Phone itself

The TextQ-Web Handles communication from itself or the Parents Phone to the Childs Phone

Childs Phone

TextQ-Web Server

Sends Emergency and Notification texts to any phone that accepts texts

## Documentation for EveryoneTexts Safe Texting Application

**Help PDF Download at below**

[www.everyonetexts.com](http://www.everyonetexts.com)

### One Click Auto Safety:

Turns on Auto Safety Driver mode and the Activate Check box in the Settings Tab:

This feature sends the message seen in One Click Auto Safety/Reply to anyone who texts you. To also send this message to those who call you, click on Phone Call Text Reply in the Settings tab.

To Change the message sent to others in this mode:

Click One Click Auto Safety/Reply, then

Click on Change below and click on the message you want to use. You will then see that message in the box. Click the arrow on top left and you're done.

To add a New Message, follow the instructions in Create General Auto Reply. It is recommended that you set this message to "I am currently driving safely and will get back to you shortly." For other Auto Reply options, use the General Auto Reply Tab.

### General Auto Reply:

Turns on General Auto Reply and the Activate Check box in the Settings Tab:

This feature takes the message seen in General Auto Reply and sends it to anyone who texts you.

To also send this message to those who call you, click on Phone call text reply in the Settings tab.

To Create New Message:

Click General Auto Reply

Click Create General Auto Reply

Type in your new message

Click OK button

Click General Messages tab and scroll down to see New Message

Click arrow to return to previous screen

Click arrow at top left to return to Main Menu

To Modify Existing Message:

Click General Auto-Reply

Click General Messages to see all available messages

Click the Pencil Icon to modify an existing message

Tap box and modify the message

Click OK on bottom,

Click arrow to go back to prior screen

Click arrow again to go to the Main Menu

To Change Message to Use:

Click General Auto-Reply

Click General Messages to see all available messages

Click the message you choose, then click arrow on the top left to return

*Individual Auto Reply: Coming Soon*

*BroadCast Messaging: Coming Soon*

## Documentation for EveryOneTexts Safe Texting Application

**Help PDF Download at below**

[www.everyonetexts.com](http://www.everyonetexts.com)

### **Blocked Users:**

This feature is available to Auto Reply to any specified phone book entries or to all people not in your phone directory:

'I do not accept texts from those not in my Contact List'

Click Blocked Users

Click Radio, Select All to select all phonebook entries

Click Radio button, Deselect All to deselect all phonebook entries

Click box to the right of the Contacts Name to select that contact

Click box next to 'Block All None Phone Book Contacts'

All Checked Contacts and if selected all none phone book people texting You will receive the above message, however, you will still receive the text for your reference.

### **Parent Mode:**

Enter Password (default password is 123456),

Click Enter

This feature protects young drivers by auto replying to incoming texts and notifies an adult that this phone was texting while the young driver was driving.

Click Parent Mode

Click Radio button to turn this feature on or off

If turned on – When this phone is moving greater than 5 MPH and the user is texting, a text will be sent to the number below that the user was texting while driving.

When parent mode is turned on, the Settings screen will turn on Parent mode permanently until turned off from the Parent Mode Screen and will be operational even when Activate Radio on the Settings screen is turned off.

'Enter phone number to be notified when text and driving take place:'

Enter your cell phone or SMS device number here. This phone number will be texted: "This phone texted while in Parent mode while driving."

### **Settings:**

Activate Click to turn on, click again to remove the check mark and turn off.

Activate will automatically be turned on when the user clicks One Click Auto-Safety/Reply or General Auto Reply on the Main Menu.

The drop down box has two entries:

One Click Auto Safety or General Auto-Reply

This drop down box will automatically be put in one of these modes when One Click Auto-Safety/Reply or General Auto Reply is clicked on in the Main Menu.

Parent Mode: Always on if turned on in Parent Mode Screen.

Turn parent mode on so this phone will automatically send a default text to the adult's number in the Parent mode screen when this phone is texting while driving or moving over 5 MPH.

Phone Call Text Reply:

Sends a Text message Auto Reply to those who call you while your phone is set to Activate in the

Settings screen. The message that will be sent is the same message that the phone mode is set to.
