# Where to Download AMB Community Edition

- If downloading from Source Forge, Read the “AMB Community Open Source Read Me.pdf” file in the following Directory on your C: Drive or Installed Drive

c:\program files\AMB New Generation Data Empowerment\AMB New Generation Data Empowerment License

The URL to download AMB Community from SourceForge:

- <http://sourceforge.net/projects/ambdatapfiler/>
- If downloading from [www.ambpdm.com](http://www.ambpdm.com) go to
  - <http://www.ambpdm.com/amb-community-edition-download-page.html>

## After the download of AMB Community Edition from SourceForge:

- **The first file that you downloaded is:**
  - **AMBPDMSourceCodeSetup.rar - with no password necessary**
- **The AMBPDMSourceCodeSetup.rar file contains:**
  - **The AMB Community Edition Source Code MSI/Setup.exe. This extracts the source code to c:\program files\AMB New Generation Data Empowerment Directory**
  - **Creates an exe from the source code to Run the AMB Community Edition, and to use the AMB Community Edition now.**
  - **A license file containing the License(GNU GENERAL PUBLIC LICENSE Version 3, 29 June 2007.rtf) and this Read Me File. These are installed in the**  
c:\program files\AMB New Generation Data Empowerment\AMB New Generation Data Empowerment License  
*All of these are accessible by clicking on Start, All Programs, AMB New Generation Data Empowerment Community V1.01 and sub folders, AMB New Generation Data Empowerment and License subfolders.*
- **Download the AMBPDMBusinessDIISetup.rar Activation file:**
  - **This MSI/Setup loads the AMB Community Edition Activation File**
  - **To download this file you must register and download this file from:**
    - <http://www.ambpdm.com/amb-community-edition-download-page.html>
    - **Click on** “You must first register to receive your password to download the Activation MSI – click here to register to receive password...” to register and receive the **“Password”**
    - **Download the AMBPDMBusinessDIISetup.rar file and run the setup / you are now activated and ready to go!**

## How to Download from the AMB Website:

### ➤ The URL to download is:

- <http://www.ambpdm.com/amb-community-edition-download-page.html>
- Download the **AMBPDMSourceCodeSetup.rar** - no password necessary

### ➤ The AMBPDMSourceCodeSetup.rar file contains:

- The AMB Community Edition Source Code MSI/Setup.exe. This extracts the source code to c:\program files\AMB New Generation Data Empowerment Directory
- Creates an exe from the source code to Run the AMB Community Edition, and to use the AMB Community Edition now.
- A license file containing the License(GNU GENERAL PUBLIC LICENSE Version 3, 29 June 2007.rtf) and this Read Me File. These are installed in the

c:\program files\AMB New Generation Data Empowerment\AMB New Generation Data Empowerment License

All of these are accessible by clicking on Start, All Programs, AMB New Generation Data Empowerment Community V1.01 and sub folders, AMB New Generation Data Empowerment and License subfolders.

### ➤ Download the AMBPDMBusinessDIISetup.rar Activation file:

- This MSI/Setup loads the AMB Community Edition Activation File
- To download this file you must register and download this file from:
  - <http://www.ambpdm.com/amb-community-edition-download-page.html>
  - Click on “You must first register to receive your password to download the Activation MSI – click here to register to receive password...” to register and receive the **“Password”**
  - Download the AMBPDMBusinessDIISetup.rar file and run the setup / you are now activated and ready to go!

## Getting Started with AMB-PDM and Requirements:

- **This AMB Community Edition only:**
  - Targets its repository of heuristic results in MS SQL Server, AMB-PDM Enterprise version also targets Oracle and DB2/UDB
  - To download MS SQL Server (2005 or 2008 – Express or full version)
    - <http://www.microsoft.com/express/database/>
  - The Community version sources Oracle, SQL Server and DB2/UDB, AMB-PDM Enterprise Version Sources – Oracle, SQL Server, DB2/UDB, DB2/400, DB2/Mainframe, Teradata, PostGre, Netezza, Flat Files and our new Profiling and matching of Unstructured XML and Streaming Data
  - The AMB Open non proprietary Target Repository can be accessed with any tool that reads MS SQL Server
  - AMB Offers a BI Front END that reads the results, Drills Back to originating source data (we profile at the source data, no need to move data to be profiled) exports to Excel, xml and other formats and more

## Getting Started with the AMB-PDM Profiling Engine:

- **This AMB Community Edition has Documentation:**
  - **The Documentation is found in the following directory:**
    - **C:\Program Files\AMB New Generation Data Empowerment\AMB New Generation Data Empowerment Community V1.01\AMB New Generation Data Empowerment\bin\Debug\AMBPredictiveDataManagement.chm and several additional help files**
  - **Double Click on the file named AMBPredictiveDataManagement.chm to get started creating the AMB-PDM Target Open Repository**
  - **Once your logged in the AMB-PDM Profiling Product the online help is available**
  - **AMB Recommends taking our one hour live web training, go to <http://www.ambpdm.com/communityedition.html> to register / request information on AMB's Training and additional documents**

# Q&A

## Next Steps

If you have any questions at all, Please email AMB at:  
community@ambpdm.com or go to: <http://www.ambpdm.com/form.html>

Thank You
