Letter of Recommendation

To whom it may concern,

It is with great pleasure and enthusiasm that I am writing to endorse the enVigil video server product from Cradle Technologies.

Over a year ago when we first started our search for a Video server we were perplexed by the overwhelming choices and complication of most video products. After careful comparison we found the enVigil video server served not only the needs of today, it's also supported the future upgrades we performed later that year.

We have not seen any other product that satisfies the versatility, scalability and value of this product.

We initially purchased the enVigil video server to protect our server room and filing area. After installation of the system our engineers expanded the coverage throughout the entire facility.

The enVigil system ease of access is one its most compelling features – we appreciate the ability to access our video from any connection anywhere in the world.

Our engineers have appreciated the generous support that the Cradle team has provided for their cutting edge product.

The Feeva team highly recommends the enVigil product and we look forward to many worry-free years of service from our Cradle system.

Best Regards,

Jaz Banga
President & Co-Founder
