## SECURITY

*Our security solutions include individual services or completely integrated systems for burglar alarm installation and monitoring, video surveillance and digital recording systems, access control via electronic locksmith applications and partial or whole house intercom systems.*

### SECURITY SYSTEMS

Complete alarm system installation, monitoring and service & maintenance plans are available for home owners and residential builders. Small and large projects are no problem for our well trained staff of security specialists.

### VIDEO SURVEILLANCE

Security camera installations with digital recording services are a specialty of ABV. Camera systems can be monitored and controlled via user friendly web interface as well as handheld devices (palm, windows mobile, smart phone, etc.). Ideal for remote locations, second homes and rental properties.

### ACCESS CONTROL

Custom door, gate and other entry systems can be installed with a variety of electronic locksmith technologies. Access control systems can be monitored and controlled via web interface. Also ideal for remote locations, second homes and rental properties.

### COMMUNICATION

Partial or whole residence intercom systems can be installed and integrated with your home control infrastructure. A variety of wireless and cellular initiation and back-up systems are available for all security and communication needs.

## AUTOMATION

*ABV's automation and control solutions include individual services or completely integrated systems for home automation, lighting and environmental control, home audio/video/theater, energy management and structured wiring services for home technology infrastructure needs.*

### HOME CONTROL

Completely integrated home automation and control systems for your security, environmental, entertainment, and other infrastructure systems within your residence. Multiple interface methods including web based, keypads and master stations, hand held devices and mobile phones.

### ENVIRONMENTAL CONTROL

Partial or whole residence control of interior and exterior environmental home infrastructure including lighting, thermostats (HVAC), water heaters, irrigation and other home systems is available. Systems can be completely automated and integrated with multiple solutions for enabling, monitoring and maintaining your home control experience.

### ENTERTAINMENT SYSTEMS

All in-home entertainment systems (home theater, home audio, intercom, video, etc.) can be managed and monitored with your integrated home control solution.

### STRUCTURED WIRING

Complete residential wiring infrastructure including telephone, data/network, audio, video and security is offered. Ideal for home office requirements and "future proofing" your residence for today's and tomorrow's electronic and technical needs.
