FILM REVIEW PAGE 4

Epic Enrichment week has taken place!

Enrichment week is from the 5th of February to the 10th.

We interviewed Mrs Kelly, head teacher of The Priory Primary School, and all of the other teachers about what they think about enrichment week. We will start with the infant teachers' then progress towards the top of the school. We have also interviewed 3 Year R pupils about how they like enrichment week.

Mrs Austin, Year R teacher, has quoted "I like Zumba as it

is good for the children and is really fun!"

Mrs Britt, Year 1 teacher said "I like ditching lessons and making the fun lessons better so children will enjoy school more!"

Year 2 teacher, Mrs Love's opinion was that Zumba was brilliant as it has sensational opportunities for everyone".

Miss Tucker, Year 3 teacher, exclaimed "the science man was fantastic and the children have lots of other opportunities this week."

Mrs Candy, teacher of year 4, said "Lovely not having to do so much planning also I'm devastated that the falconry was cancelled!"

The year 5 teacher, Mr

Beckett, stated "There is a range of astounding activities which give the children good opportunities that might help them in there later life."

The Year 6 teacher, Miss Scott, exclaimed "all the activities were good for different reasons and all the children get fantastic experiences throughout the week."

By Archie and Joseph.

Kite making takes over the priory

The priory school makes kites for enrichment week on the 8th of February for the first time!

This has been most recent favourite for the school during enrichment week. Dulcie a year 6 student said that "I think it was brilliant making the kites. The one thing I liked best about the experience was flying the kite!" Dulcie was not the only one who felt like this many of her class mate's quotes were that it was a brilliant experience.

Lego day is here once again!

Last year there was a Lego day and it was a huge hit with the pupils in the juniors but this year the school has gone to a whole new level because now the infants have been doing it .

Lego previously originated in Denmark. Lego was invented by a person called Mr Ole Kirk Christiansen who is the grandfather of the company owner today, Mr, Kjeld Kirk Kristiansen. Mr Kirk Christiansen was a carpenter who lived in Bilund, Denmark and that is also where the company began. Little did he know from one decision of depression, one of the most popular toys in the world would be created.

Mrs Kelly the head teacher has organised a fun day for the pupils of the school. One reporter asked a pupil in year six how did they liked the Lego day last year and she said, "I loved it and I hope they keep carrying it on for other people at the school."

The infants have been making little houses and later on they will join it to a car park and lots of other daily life objects such as plants, sky scrapers and land marks. To me and the other children the man sounds interesting and really making the Lego really educational.

The infants have been making little houses and later on they will join it to a car park and lots of other daily life objects such as

plants, sky scrapers and land marks. To me and the other children the man sounds interesting and really makes the Lego educational.

The man, for a living, goes round to other schools to do the Lego day. He does four different Lego days, electric which involves bulbs and wires, village day which is what children are doing if they are in the infants, but if children are in the juniors they will be doing an Olympic city based on the 5 colours of the Olympic rings. They will also be doing transport which is where you make lots of objects with wheels and bricks. The forth is transport so things like space ships, cars, buses and scooters.

The man also brought Animals such as horses, dogs and cats. They also had some staircases to go in and out of their houses. They could also put boats as extras and gates to keep the nosy neighbours out of your business. Some of the children preferred to build windows, doors and bricks. On the other hand some of the others only wanted bricks and a door.

The Lego helps to boost their self steam and also helps their imagination grow so when they're older they'll be able to think of creative stories if needs be at the school.

Fantastic falconry cancelled, what happened?

Sadly the falconry was cancelled due to the falcons not feeling so good about travelling in the cold icy snow. Fortunately the date has been changed to the 21st of February 2012 and hopefully it won't be snowing again.

Christmas is back! *(Not really!)*

On Friday we all woke up to find everything covered in snow!

On Friday 10th February our reporters woke up to find everything covered in snow! This was a dramatic change in the weather and all the children were very happy. The activity of Millers Ark, still came even though the weather could have caused delays. In the morning the field was completely covered but soon the snow was only in small patches because all the children had been playing and building giant snowballs. Unfortunately, the front playground had been slightly gritted and most of the snow had melted. This was not that bad though because the animals weren't in deep snow. Met office forecasts tells us that there is a yellow warning of ice tomorrow. **The weather has had a dramatic change and everyone is happy.**

The Wacky Wild Science Man!

On Monday 7th of February, a science man called Ian Dunne came to our school and explained a lot of key facts throughout an assembly and really got the little ones interested about the world and what's in it. He also explained about gravity and how it works. The children also found out who discovered gravity.

Ian explained how a plane can fly. A toy aeroplane was powered by a rubber band and it was wound round and round by this small object that made the plane fly. When it got let go the plane started to fly a couple of feet above our heads and as the band started to twist back the round the other way and the plane began to lower slowly.

All the kids thought Ian was very fun and entertaining to listen to and if you asked them if they wanted to have him again, all the children said yes. The members of staff actually said that he was really funny and made science more interesting and very educational and child friendly for all ages from year R up wards. I hope that the school organise him again because he was very entertaining but educational.

Zumba get into the grove!

Zumba

The exciting new way of doing exercise, the active has been very popular with the school. A reporter went round to the infants and asked them if they liked zumba. She found that it was an ultimate hit but a few said it was quite tiring. This active is run by Julie Spencer.

Zumba is a brilliant way of doing exercise with a range of different songs to dance too. We interviewed a pupil in year 6 called Amelia Burbrige she said "I like it zumba, I have been doing it for a couple of months now and it is really fun. "Afterwards the reporter went to interview the head teacher, Mrs Kelly, who said "we have never had zumba before and the pupils who do the club (pupils and teachers) said that they loved it. As the person who does the zumba club has a child going to the school it was rather easy to contact her."

Zumba was brought into fashion of dance in 1990's this was due to man called Beto Perez turned up to teach a normal fitness lesson that he taught. He realised that he had forgotten his music and got some other music which was his favourite listening music out of his bag. Then he began to teach the traditional Latin dance steps and that was how Zumba was born.

The Majority of people loved Zumba from our report results so if your child would like to join Zumba your child is shore to enjoy it.

Sports Outrage

Mrs Kelly, head teacher of The Priory Primary School, was on Tuesday 7th of February informed, to her disappointment, that the football and netball matches had been cancelled.

The team was devastated because they had been practicing for weeks. Miss Tucker, the netball team coach, said, "Because I knew the children were so excited it was hard to tell them the match was cancelled!"

Burnham Copse, the school that cancelled the match, stated that it was cancelled due to bad weather. After this statement was told to the school an outraged student said, "The weather wasn't that bad so I thought at least one match could go on!" said Abi, Aged 11. Abi was 1 of a number of children that felt like this and we have yet to find if the match will be reinstated. Hopefully it will be reinstated by the end of February because it's so disappointing for the children of The Priory Primary School.

The Talent show arrives!

On the 16th of March the talent show is here once again! This is the 7th and is going to be the best!!

The talent show is on the 16th of March, this is the 7th annual talent show. This is a great way to show off the children's talents. We have interviewed 2 year 6 pupils who have been in the competition before and had loved it! First, Matthew. He said, "Everyone in the school has their chance to shine and have their moment."

Second, Maddie said, "The night is really fun because we get glow sticks and we get to watch all the contestants' talents."

The dress rehearsal is on 6th of March. The talent show is open to all years.

No matter what the talent is everyone has a talent.

The talent show is almost here so be prepared for the talent! Open to all years and is the 7th annual.
