SECONDARY EDUCATION MAJOR – 130 HOURS
MATHEMATICS PROFICIENCY

This course of study seeks to instill the proper Biblical philosophy of Christian education while equipping the student with a general understanding of children's learning abilities, effective methods of teaching and classroom management skills. Students who wish to enter this course of study must name their proficiency while enrolling in the fall semester of their sophomore year. Through weekly practical classes students will also have the opportunity to exercise their skills and knowledge in a classroom setting. In addition, students will learn their role in the local church ministry, the importance of a daily walk with God and the joy of being a soul winner.
