

TASI Group completes the acquisition of Vögtlin Instruments AG

Addition of Vögtlin adds Thermal Mass Flow capability to TASI Flow platform product line

Cleves, Ohio, September 9, 2011

The TASI Group today announced the acquisition of Vögtlin, Instruments AG, a flow meter manufacturing company located in Aesch, Switzerland.

With this acquisition, the TASI Group adds Thermal Mass Flow instrumentation to its already broad Flow Platform product range.

Vögtlin manufactures a full range of Thermal Mass Flow meters and controllers, as well as a line of Variable Area meters for precision gas flow measurement and mixing. They serve a diverse base of market verticals which includes Life Science, Biotechnology, Laboratory, Process, Energy and Semiconductor.

Vögtlin Thermal Mass Flow meters utilize a unique sensor technology, which enables their meters to perform extremely high accuracy flow measurement with wide turndown ratios, while simplifying their calibration & integration.
