

Snake Chaser NITRO

Our smooth Snake Chaser stout is now blended with nitrogen to pour on a standard nitrogen tap line to yield a gorgeous cascading effect when poured. This velvety stout pours black with a classic, signature creamy head. Toffee and coffee aromas and flavors in this hearty ale are perfectly balanced. Lightly hopped, the flavor is full of the roasted malts and finishes with very low sweetness.

Goes well with dark chocolate (as long as it's not too sweet), as well as many grilled entrees, which compliment the roasted flavors of the dark malts. Ideal serving temp: 38-42° F.

Available year round

Alcohol by volume - 4.9%

Available in the following formats:
Half-barrels (15.5 gallons - WI only)
30L barrels (7.92 gallons - WI only)
